I do alot of traveling, being able to concentrate on the road instead of trying to find a new radio station every hour or two is much safer. I dont know about you without a radio playing I seem to dose off while im driving. With my XM radio I put the station I want and go. Also with the touch of one button, without taking my eyes off the road I can get traffic and weather reports for where I am driving to and go a safer route witch will also lessenens the amount of trafic congestion in the area.ALSO, since I have a pick up truck with my bags in the back, if I know the weather in the area I am going through, I can pull off in a rest area and cover my cargo instead of pulling off on the shoulder, SAFER!!!!!!
